

Early Identification & Intervention: Connecting Data to Policy

January 23, 2012

Susie Baldwin, MD, MPH

Office of Health Assessment & Epidemiology

Los Angeles County Department of Public Health

Questions for Determining Children's Special Health Care Needs or Disabilities (LACHS 2005)

Questions Developed by the California Children and Families Commission and the Child and Adolescent Health Measurement Initiative

Does (name) currently need or use medicine prescribed by a doctor (other than vitamins)?

IF YES, ASK:

Is this because of any medical, behavioral or other health condition?

IF YES, ASK:

Is this a condition that has lasted or is expected to last for at least 12 months?

Questions for Determining Children's Special Health Care Needs or Disabilities (LACHS 2005), Continued

Does (name) need or use more medical care, mental health, or educational services than is usual for most children of the same age?

Is (name) limited or prevented in any way in (his/her) ability to do the things most children of the same age can do?

Questions for Determining Children's Special Health Care Needs or Disabilities (LACHS 2005), Continued

Does (name) need or receive special therapy, such as physical, occupational or speech therapy?

Does (name) have any kind of emotional, developmental or behavioral problem for which (he/she) needs or receives treatment or counseling?

Data!

Prevalence and Demographics

Percent of LA County Children (0-17 years old) with Special Health Care Needs, by Age Group (LACHS 2005)

Percent of LA County Children (0-17 years old) with Special Health Care Needs, by Gender and Age Group (LACHS 2005)

Parents' Race/Ethnicity for Children (0-17 years old) with Special Health Care Needs (LACHS 2005)

Latino White African American Asian/Pacific Islander

Parents' Race/Ethnicity

LA County Children with Special Health Care Needs, by Parents' Race/Ethnicity (LACHS 2005)

* The estimates are based on a small sample size

Parents' Education Level for Children (0-17 years old) with Special Health Care Needs (LACHS 2005)

Legend:
 ■ < H.S. ■ H.S. ■ Some College or Trade School ■ College or Post Graduate Degree

Parents' Education Level

Birthplace of LA County Parents of Children (0-17) with Special Health Care Needs (LACHS 2005)

Estimated Numbers of Children (0-17 years old) with Special Health Care Needs, by Supervisorial District (LACHS 2005)

- Gloria Molina
- Mark Ridley Thomas
- Zev Yaroslavsky
- Don Knabe
- Mike Antonovich

Rate of Children (0-17) with Special Health Care Needs, by Supervisorial District (LACHS 2005)

Prepared by Office of Health Assessment & Epidemiology,

LA County Children (0-17) With Special Health Care Needs (LACHS 2005)

Compared with National Survey of Children with Special Health Care Needs (2005/2006)

Annual Incidence of Autism in California (1990-2006)

Picciotto and Delwiche, 2009.
CA Department of Developmental Services data

Parental Risk Factors

LA County Parents' Reported Level of Difficulty in Finding Someone to Ask for Advice on Raising Their Child, Comparing Parents of Children (0-5 years old) With or Without SHCN (LACHS 2005)

LA County Parents of Children with Special Health Care Needs Who Are Currently Receiving Counseling, by Child's Age Group (LACHS 2005)

Children's Age Group (Years)

* The estimate is based on a small sample size and should be interpreted with caution.

Risk for Depression Among LA County Parents of Children (0-17 years old) With or Without Special Health Care Needs (LACHS 2005)

Diagnosed Depression Among LA County Parents of Children (0-17 years old) With or Without Special Health Care Needs (LACHS 2005)

“Aggravation Level” for LA County Parents of Children (0-5 years old) With or Without Special Health Care Needs (LACHS 2005)

Child and Family Routines

Percent of Parents, or Other Family Members, Who Read to Child Every Day (in a Typical Week) for Children (0-5) With or Without Special Health Care Needs (LACHS 2005)

LA County Health Survey

The Los Angeles County Health Survey is a population based telephone survey that provides information concerning the health of Los Angeles County residents. The data are used for assessing health-related needs of the population, for program planning and policy development, and for program evaluation. The relatively large sample size allows users to obtain health indicator data for large demographic subgroups and across geographic regions of the County, including Service Planning Areas and Health Districts.

LA County Health Survey

The **Los Angeles County Health Survey** is currently in progress. You may receive a call from one of our survey interviewers, who will identify himself/herself as calling from the Department of Public Health.

The interviewers will immediately ask you how many people live in your household, including how many children, in order to select the person or people who will complete the survey.

The survey will ask many questions about your health status, health conditions, behaviors, and opinions.

While some of the questions are personal, all information is completely confidential and is handled in accordance with federal privacy laws and with the highest ethical standards. Our interviewers will NEVER ask you for your Social Security number, driver's license number, or bank information.

Please consider participating in this survey, as it helps Los Angeles County understand and address the health issues of our population. For more information, contact the Health Assessment Unit at (213)-240-7785.

Health Survey Query Form

- Please specify what year you want to query data for:
2007
2005
- Please specify whether you want to query data on adults or children:
Adults
Children
- Please select the general category your query falls into:
Health Conditions
Substance Use
Access to Care
Health Behaviors
- Please select a specific health topic within that category:
Cholesterol Level
Depression
Diabetes
Heart Disease
- Do you want your results separated into demographic categories (stratified)?
Don't Stratify
- Do you want your results stratified by a second variable?
Don't Stratify
- Please select gender categories to include in your query:
Both
- Please select race/ethnic group(s) to include in your query:
All
Latinos
Whites
Blacks
- Please select the age range of interest:
18 to 100+ year olds
- Do you want to select specific Service Planning Areas (SPAs)? (you may select more than one)
All SPAs
1 -- Antelope Valley
2 -- San Fernando
3 -- San Gabriel
4 -- Metro
- Do you want to select specific Health Districts? (you may select more than one)
All Health Districts
3 -- Alhambra
5 -- Antelope Valley
6 -- Bellflower
9 -- Central
- Please select result type of interest:
Generate Tables
Generate Graphs

Select: Survey Year, Adult/Child data, Health Indicator, Stratification Levels, Geographic Area, Result Type

Health Survey Dataset :: Query This Dataset

Health Survey Query Form

Table 1. Percent of Adults (18+ Years Old) Ever Diagnosed with High Blood Cholesterol.

Percent	Confidence Interval	Estimated Number
29.1%	27.8% - 30.3%	2,154,000

[Printable \(PDF\)](#) [Editable \(RTF\)](#)

Documentation for your query are provided below:

Source: 2007 Los Angeles County Health Survey. Office of Health Assessment and Epidemiology, Los Angeles County Department of Public Health. If you have questions about the results of your query, please contact us at (213) 240-7785.

Note: Estimates are based on self-reported data by a random sample of 7,200 Los Angeles County adults, representative of the adult population in Los Angeles County. The 95% confidence intervals (CI) represent the variability in the estimate due to sampling; the actual prevalence in the population, 95 out of 100 times sampled, would fall within the range provided.

Constraints for the Query are as follows:

- a. Data were only used for individuals ages 18+ year(s) old.

Report created on 02/09/2010.

This request took 1.80 seconds of real time (v9.1 build 1461).
